310 MARK II SERIES

The 310 Series from Accutone® have always been the most popular headset for office executives and professionals. Due to the combination of elegant design, light weight, and audio excellence, the 310 is truly unique in the market.

Based on this successful positioning, the Mark II focuses on further improving these features. From a design perspective, the 310MKII, while maintaining its minimalistic appeal, looks even better than its predecessor in terms of simplistic curves and contrasting colors.

In terms of functions, Mark II gets an upgrade in its HD Wideband loudspeakers and Noise Cancelling microphone chamber design. The Accutone Soft Microphone Boom design allows dual-microphone option. Sharing the same design with Lexus 1010, its Pro-Grade Leatherette earpiece is detachable and easily replaceable.

Versatility is key for the 310, and with Mark II, it comes with a standard telephone quick-disconnecting cable convertible to USB and UC connectivity, as well as the optional dual-microphone ProNC version.
